Re:

United States of America, et al. vs. Reilly Tar & Chemical Corporation, et al.

File No. Civ. 4-80-469 CD-RAP Section 11.5.3

## Gentlemen:

In accordance with Section 11.5.3 of the Consent Decree-Remedial Action Plan in the above captioned matter, please find the enclosed Construction Report for Louisiana Avenue Traffic Improvements on the southern edge of the Reilly Site. This report is issued by the City of St. Louis Park who completed this traffic improvement project.

The Construction Report describes the construction and the procedures for managing soils encountered during construction that may have contained PAH. This report is consistent with the soil management and documentation procedures used for the recent park improvements at the Reilly Site and the Block 7 Construction reconstruction. One difference is that all soil was disposed off site, because there was no space available within the project boundaries to place excavated soil that contains low levels of PAH.

If you have any questions, or require further information, please contact this office.

Sincerely,

William M. Gregg Project Leader for the City of St. Louis Park
